

EXP_02. Set up an Azure DevOps project

AIM:

To set up an Azure DevOps project for efficient collaboration and agile work management.

STEPS:

1. Create an Azure account
2. Create the First Project in Your Organization
 - a. After the organization is set up, you'll need to create your first project. This is where you'll begin to manage code, pipelines, work items, and more.
 - b. On the organization's Home page, click on the New Project button.
 - c. Enter the project name, description, and visibility options:

Name: Choose a name for the project (e.g., **LMS**).

Description: Optionally, add a description to provide more context about the project. ***Visibility:*** Choose whether you want the project to be **Private** (accessible only to those invited) or **Public** (accessible to anyone).
 - d. Once you've filled out the details, click Create to set up your first project.

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your

user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

4. Project Dashboard

5. To manage user stories:

- From the left-hand navigation menu, click on Boards. This will take you to the main Boards page, where you can manage work items, backlogs, and sprints.
- On the work items page, you'll see the option to Add a work item at the

top. Alternatively, you can find a + button or Add New Work Item depending on the view you're in. From the Add a work item dropdown, select User Story. This will open a form to enter details for the new User Story.

ID	Title	Assigned To	State	Area Path	Tags
31	Secure Data Handling and System Monitoring	Pradhikshya Anand	Active	Appointment_Booking_System	
27	Feedback and Appointment History	Pradhikshya Anand	New	Appointment_Booking_System	
29	Implement feedback storage and appointment history tracking	Saranya	New	Appointment_Booking_System	
30	System Security and Monitoring	Thanashree G R	New	Appointment_Booking_System	
32	Implement data security measures and system monitoring using Azure	Saranya	New	Appointment_Booking_System	
28	Feedback Submission and Appointment History	Saranya	New	Appointment_Booking_System	
25	Appointment Notifications	Thanashree G R	New	Appointment_Booking_System	
22	Appointment Booking by Specialization	Pradhikshya Anand	New	Appointment_Booking_System	
19	Doctor Schedule Management	Saranya	New	Appointment_Booking_System	
10	Patient Registration and Secure Login	Thanashree G R	New	Appointment_Booking_System	
26	Implement notification system for booking and reminders	Unassigned	New	Appointment_Booking_System	
24	Automated Notifications System	Unassigned	New	Appointment_Booking_System	

RESULT:

Successfully created an azure DevOps project with user story management and Agile workflow setup.
